---

### Professional Summary

Database-focused Full-Stack Developer with 20+ years of experience studying and working with **relational databases (PostgreSQL, MySQL)**. Skilled in **ER modeling, schema design/normalization, SQL & query optimization**, and **database maintenance** (backups, migrations, indexing, integrity). Builds data-driven applications where every feature starts with the data model. Background in accounting and e-commerce enables practical, reliable solutions for real-world operations.

---

### Technical Skills

- **Relational Databases:** PostgreSQL, MySQL, SQL, SQLAlchemy; ER diagrams; 3NF normalization; constraints & FKs; transactions; indexing; performance tuning; backup/restore; migrations; seed data; recovery testing
  - **Frontend Development:** HTML5, CSS, React, Bootstrap
  - **Back End:** Python (Flask, Django), RESTful APIs, authentication/authorization. Tools: Git, GitHub, Docker, AWS
  - **Cloud/DevOps:** Docker, AWS (EC2/S3 basics), Git, CI-friendly workflows.
- 

### Projects

#### Repair\_or\_replace-back\_end - [Github](#)

- Backend system for homeowners/landlords to track appliances, repairs, and investments.
- Designed **PostgreSQL relational schema & ER diagram** (Properties, Appliances, Repairs, Investments); enforced integrity with FKs/constraints.
- Implemented CRUD and **indexed reporting queries** for cost analysis; REST API for front-end use.
- **Tech:** Python, Flask/Django, SQLAlchemy, PostgreSQL, REST.

#### E-commerce Platform - [Github](#)

- Full-featured store (registration/login, cart, checkout, order history) **driven by a MySQL schema**.
- Built **ER model** (Users, Products, Orders, Payments); normalized tables for scalability & consistency.
- Implemented transactions and analytics queries for order KPIs and user activity.
- **Tech:** Flask, React, MySQL/SQL, AWS, Docker.

#### Library Management System - [Github](#)

- Registration, borrowing/returns, and inventory powered by a **relational data model**.
- Designed **ER diagram** (Members, Books, BorrowRecords, Inventory); created procedures for **backups and integrity checks**.
- All functions (borrow/return, penalties, inventory updates) implemented via structured SQL queries.
- **Tech:** Python, SQL.

## Professional Experience

### Software Engineer Trainee — Coding Temple (Remote) | 05/2024 – Present

- Designed **relational schemas** and **ER diagrams** across multiple projects; applied normalization and constraints.
- Improved performance with **query optimization & indexing** (EXPLAIN/ANALYZE, coverage indexes).
- Built REST APIs on top of relational models; all app features are **database-driven** (auth, cart/checkout, reporting).
- Established **database maintenance**: backups, migrations, seed data, and recovery tests.
- Deployed services via **Docker + AWS**; ensured reliable, repeatable DB migrations.

### Administrative Assistant

John H Wu Medical Office, San Francisco, CA | 01/2021 – 12/2022

- Introduced a document management system, improving efficiency by 20%.
- Streamlined administrative workflows using Excel/PowerPoint.
- Maintained patient database, ensuring accuracy, confidentiality (HIPAA-minded), and reliable record retrieval.

### E-Commerce Business Owner

Self-Employed, San Francisco, CA | 06/2014 – 09/2020

- Built and managed an online platform for educational material sales; achieved \$400,000+ revenue.
- Ran campaigns with Shopify & Google Ads to improve engagement.
- Maintained customer database, tracking orders, payments, and communications to increase retention.
- Handled bookkeeping tasks, recording sales, expenses, and reconciliations to support accurate financial reporting.

---

## Education

### Coding Temple Software Engineering Bootcamp

#### Certificate of Completion | Backend Specialization | December 2024

- Mastered Python, Flask, React, SQL, and GraphQL.
- Focused on database-driven applications (PostgreSQL/MySQL, ER modeling, schema design, SQL optimization) and full-stack development (Flask/Django, React).

### Devry University, Oakland, CA

#### Master of Accounting & Financial Management | 2013

- Focused on data analysis and financial modeling.

---

## Certifications

- Coding Temple Full-Stack Software Engineering Certificate (2024)
- Master of Accounting & Financial Management (2013)
